## **Table of Contents**

Part I: E	Brains & Inspiration
Chapte Chapte	r 1: Introduction to Neuroscience ↔ AI### r 2: Neuroscience Foundations### r 3: Spatial Navigation### r 4: Perception Pipeline###
Part II: I	Brains Meet Math & Data
Chapte Chapte	r 5: Brain Networks### r 6: Neurostimulation### r 7: Information Theory### r 8: Data Science Pipeline###
Part III:	Learning Machines
Chapte	r 9: Machine Learning Foundations ### r 10: Deep Learning ### r 11: Sequence Models ###
Part IV:	Frontier Models
•	r 12: Large Language Models### r 13: Multimodal Models###
Part V:	Ethics & Futures
•	r 15: Ethical AI### r 16: Future Directions###
Part VI:	Advanced Applications
Chapte	r 17: BCI & Human-Al Interfaces ### r 18: Neuromorphic Computing ### r 19: Cognitive Neuroscience & Deep Learning ###

C	Chapter 20: Case Studies ### Chapter 21: Al for Neuroscience Discovery ### Chapter 22: Embodied Al & Robotics ###
C	Chapter 24: Quantum Computing in NeuroAl ### Chapter 23: Lifelong Learning ###  t VII: Appendices
	Mathematical & Python Refresher ### Dataset Catalogue ### Colab Setup Guide ###
